Derive and use related facts up to 100.</p> <p>Solve problems by applying increasing knowledge of mental methods.</p>	<p>Pupils extend understanding of the language of subtraction to include <b>difference</b>.</p> <p>Practise subtraction to 20 to derive facts such as using <math>3 + 7 = 10</math>, <math>10 - 7 = 3</math> and <math>7 = 10 - 3</math> to calculate <math>30 + 70 = 100</math>, <math>100 - 70 = 30</math> and <math>70 = 100 - 30</math>. Check calculations, including by adding to check subtraction.</p>

Y3	<p>Use formal written methods of <b>columnar addition</b></p> <p><b>TU - TU</b> <b>HTU - TU</b> <b>HTU - HTU</b></p>	<p><b>Counting on</b> <math>436 - 389 = 47</math></p>	<p><b>Taking away</b> (no number line) Partitioning.: <math>326 - 178 = 148</math></p> <p><math>326 - 100 = 226</math> <math>226 - 70 = 156</math> <math>156 - 6 = 150</math> <math>150 - 2 = 148</math></p>	<p><math>874 - 523 = 351</math></p> $\begin{array}{r} 874 \\ - 523 \\ \hline 351 \end{array}$ <p>(no decomposition)</p>	<p><b>Decomposition Expanded</b></p> <p>Some children taught this method. Most use blank number lines and then move straight to columnar.</p> <p>See guidance for example.</p>	<p><b>Decomposition Columnar</b></p> <p><math>932 - 457 = 475</math></p>	<p><b>Estimate answers and use inverse to check.</b></p>	<p>HTU - U HTU - tens HTU - hundreds</p> <p>Use number facts and place value to solve problems.</p>	
Y4	<p>Use formal written methods of <b>columnar subtraction</b>.</p> <p><b>HTU - HTU</b> <b>ThHTU - TU</b> <b>ThHTU - HTU</b> <b>ThHTU - ThHTU</b></p>	<p><b>Counting on</b> <math>1324 - 968 = 356</math></p>	<p><b>Decomposition:</b> <math>1374 - 968 = 406</math></p>	<p><b>Decomposition</b> <math>1374 - 968 = 406</math></p> $\begin{array}{r} 1374 \\ - 968 \\ \hline 406 \end{array}$	<p><b>Solve subtraction two-step problems in contexts, deciding which operations and methods to use and why.</b></p> <p>Solve simple measure and money problems involving fractions and decimals to 2dp.</p>	<p><b>Estimate and use inverse operations to check.</b></p> <p>Estimate, compare and calculate different measures, including money in pounds and pence.</p>	<p><i>Pupils continue to practise both mental methods and columnar addition and subtraction with increasingly large numbers to aid fluency.</i></p>	<p><i>Pupils build on their understanding of place value and decimal notation to record metric measures, including money.</i></p>	
Y5	<p>Subtract whole numbers &gt;4 digits, including using <b>formal subtraction</b>.</p> <p>Decimals up to 2dp (eg <math>72.5 - 45.7</math>)</p>	<p>Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.</p> <p>Solve multi-step problems in contexts, deciding which operations/methods to use and why.</p>	<p><b>Solve problems involving number up to 3dp. [Fractions]</b></p> <p><b>Solve problems involving converting betw. units of time. [Measurement]</b></p> <p><b>Solve problems involving measure [eg length, mass, volume, money] using decimal notation including scaling. [Measurement]</b></p>	<p><b>Counting on</b></p> <p><math>72.5 - 45.7 = 26.8</math></p>	<p><b>Taking away</b> (no number line)</p> <p><math>72.5 - 45.7</math></p> <p><math>72.5 - 40 = 32.5</math> <math>32.5 - 5 = 27.5</math> <math>27.5 - 0.7 = 26.8</math></p>	<p><b>Decomposition</b></p> <p><math>72.5 - 45.7 = 26.8</math></p> $\begin{array}{r} 72.5 \\ - 45.7 \\ \hline 26.8 \end{array}$	<p><i>Pupils practise subtracting decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1.</i></p>	<p>Subtract numbers mentally with increasingly large numbers (eg <math>12462 - 2300 = 10162</math>). <i>Pupils mentally subtract tenths, and one-digit whole numbers and tenths.</i></p>	<p><i>They extend their knowledge of fractions to thousandths and connect to decimals and measures. Pupils should go beyond the measurement and money models of decimals (eg by solving puzzles).</i></p>
Y6	<p>Solve multi-step problems in contexts, deciding which operations/methods to use and why. Decimals up to 3dp (Context: Measures)</p>	<p>Use knowledge of the order of operations to carry out calculations involving subtraction.</p> <p>Use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.</p>	<p><b>Solve problems which require answers to be rounded to specified degrees of accuracy. [Fractions]</b></p> <p><b>Solve problems involving the calculation and conversion of units of measure, using decimal notation to 3dp where appropriate. [Measurement]</b></p>	<ul style="list-style-type: none"> <li>There was 2.5 litres in the jug. Stuart drank 385 ml. How much was left?</li> <li><math>18.07 \text{ km} - 3.243 \text{ km}</math></li> <li>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</li> </ul>	<p>Perform mental calcs, incl. with mixed operations and large numbers. <i>Using the no. line, pupils subtract positive/negative integers for measures such as temperature.</i></p>	<p><i>Pupils develop skills of rounding/estimating to predict/check order of magnitude of ans to decimal calcs. Includes rounding ans to a degree of accuracy &amp; checking reasonableness.</i></p>			

<p>Y R</p>	<p>Children ... solve problems, including doubling, halving and sharing. [Expected] Solve practical problems that involve combining groups of 2/5/10. [Exceeding]</p>	<p>Practical/ recorded using ICT (eg digital photos / pictures on IWB)  How many 10p coins are here? How much money is that?  This domino is a double 4. How many spots does it have?</p>	<p>Pictures/Objects  How many socks in three pairs? </p>	<p>Symbolic  3 pairs, 2 socks in each pair: </p>										
<p>Y1</p>	<p>Solve one-step problems using concrete objects, pictorial representations and arrays (with the support of the teacher)</p>	<p>Practical/recorded using ICT Pictures/Symbolic  There are five cakes in each bag. How many cakes are there in three bags? </p>	<p>Visual (Number lines and Numicon on Number Lines)  <math>5 \times 3</math> or <math>3 \times 5</math> [two, three times] or [three groups of two] </p>	<p>Arrays  <math>5 \times 2</math> or <math>2 \times 5</math> </p>	<p>Doubling numbers/quantities  Count on/back in 2s, 5s and 10s </p>	<p>Use Numicon to aid: </p>								
<p>Y2</p>	<p>Calculate statements for multiplication within the multiplication tables and write them using the multiplication and equals signs.  [Show multiplication of two numbers can be done in any order.]</p>	<p>Pictures/Symbolic  There are four apples in each box. How many apples in six boxes? </p>	<p>Pupils use a variety of language to describe multiplication.  Concrete-pupils use Numicon and Numicon Number Lines.</p>	<p>Repeated addition  <math>5 \times 3</math> or <math>3 \times 5</math>, <math>5+5+5</math> or <math>3+3+3+3+3</math> </p>	<p>Arrays  <math>6 \times 4</math> or <math>4 \times 6</math> </p>	<p>Recall and use multiplication facts for the 2, 5 and 10 multiplication tables, (including recognising odd and even numbers).  Use commutativity/inverse relations to develop multiplicative reasoning (eg <math>4 \times 5 = 20</math> and <math>20 \div 5 = 4</math>).</p>	<p>Pupils ... practise to become fluent in the 2/5/10 multiplication tables and connect them to each other. They connect the 10x table to place value, and the 5x table to divisions on the clock face. They begin to use other multiplication tables and recall facts, including using related division facts to perform written and mental calculations.</p>							
<p>Y3</p>	<p>Write/calculate statements using the multiplication tables that they know (progressing to formal written methods). <b>TU x U</b> (multiplier is 2/3/4/5/8/10)</p>	<p>Grid Method: <math>36 \times 4 = 144</math> <table border="1" data-bbox="369 1284 548 1364"> <tr> <td>X</td> <td>30</td> <td>6</td> </tr> <tr> <td>4</td> <td>120</td> <td>24</td> </tr> </table></p>	X	30	6	4	120	24	<p>Informal Mental Jottings: <math>36 \times 4 = 144</math> <math>30 \times 4 = 120</math> <math>6 \times 4 = 24</math></p>	<p>Expanded multiplication: <math>36 \times 4 = 144</math> <math display="block">\begin{array}{r} 36 \\ \times 4 \\ \hline (6 \times 4) \quad 24 \\ (30 \times 4) \quad 120 \\ \hline 144 \end{array}</math></p>	<p>Short multiplication (formal): <math>36 \times 4 = 144</math> <math display="block">\begin{array}{r} 36 \\ \times 4 \\ \hline 144 \end{array}</math></p>	<p>Pupils develop reliable written methods for multiplication, starting with calculations of TU by U (progressing to formal written methods of short multiplication).</p>	<p>Recall and use multiplication facts for the 3, 4 and 8 multiplication tables. </p>	<p>Through doubling, they connect the 2/4/8 multiplication tables. Pupils develop efficient mental methods, using commutativity (eg <math>4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240</math>) and multiplication and division facts (eg using <math>3 \times 2 = 6</math>, <math>6 \div 3 = 2</math> &amp; <math>2 \times 6 = 12</math>) to derive related facts (<math>30 \times 2 = 60</math>, <math>60 \div 3 = 20</math> &amp; <math>20 \times 3 = 60</math>).</p>
X	30	6												
4	120	24												

Y4	<p>Use <b>formal</b> written layout:</p> <p><b>TU x U</b> <b>HTU x U</b></p> <p>Convert between different units of measure [eg km to m; hr to mi]</p>	$43 \times 6 = 258$ (estimate: $40 \times 6 = 240$ )  $40 \times 6 = 240$ $3 \times 6 = 18$	<p>Expanded multiplication:</p> $\begin{array}{r} 43 \times 6 \\ 18 \quad (3 \times 6) \\ 240 \quad (40 \times 6) \\ \hline 258 \end{array}$	<p>Short multiplication (formal):</p> $\begin{array}{r} 24 \times 6 = 144 \\ \phantom{24} \times 6 \\ \hline 144 \end{array}$	<p>Grid Method:</p> $342 \times 7 = 2394$ 	<p>Expanded multiplication:</p> $\begin{array}{r} 237 \times 4 \\ (estimate: 250 \times 4 = 1000) \\ 237 \\ \times 4 \\ \hline 28 \\ 120 \\ 800 \\ \hline 948 \end{array}$	<p>Short multiplication (formal)</p> $\begin{array}{r} 342 \\ \times 7 \\ \hline 2394 \end{array}$	<p>Recall multiplication facts to <math>12 \times 12</math>. Use place value, known &amp; derived facts to multiply mentally, including <math>\times</math> by 0/1; <math>\times 3</math> numbers. Recognise/use factor pairs and commutativity in mental calculations.</p> <p><i>Pupils use multiplication to convert from larger to smaller units.</i></p>	<p><i>Practise mental methods and extend this to HTU numbers to derive facts, for example <math>200 \times 3 = 600</math> into <math>600 \div 3 = 200</math>. Write statements about equality of expressions [eg <math>39 \times 7 = 30 \times 7 + 9 \times 7</math> and <math>(2 \times 3) \times 4 = 2 \times (3 \times 4)</math>]. Combine knowledge of facts and arithmetic rules to solve mental/written calculations (eg <math>2 \times 6 \times 5 = 10 \times 6 = 60</math>).</i></p>
Y5	<p>Use a <b>formal</b> written method (including long <math>\times</math> for TU nos)</p> <p><b>TU x TU</b> <b>HTU x U / HTU x TU</b> <b>ThHTU x U</b></p> <p>Convert between units of measure (eg km/m; m/cm; cm/mm; kg/g; litre and ml) Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams</p>	<p>Grid Method:</p> $47 \times 36 = 1692$ (estimate $50 \times 40 = 2000$ ) 	<p>Multiply fractions:</p> 	<p>Short multiplication (formal)</p> $\begin{array}{r} 2741 \times 6 = 16446 \\ (estimate 3000 \times 6 = 18000) \\ \phantom{2741} \times 6 \\ \hline 16446 \end{array}$	$24 \times 16 = 384$ $\begin{array}{r} 24 \\ \times 16 \\ \hline 144 \\ 240 \\ \hline 384 \end{array}$ <p>(estimate <math>25 \times 15 = 375</math>)</p>	<p>Long Multiplication</p> $\begin{array}{r} 124 \\ \times 26 \\ \hline 744 \\ 2480 \\ \hline 3224 \end{array}$ <p><math>124 \times 26 = 3224</math> <b>[see Y6]</b></p>	<p><b>Pupils connect multiplication by a fraction to using operators (fractions of), and to division. This relates to scaling by simple fractions, including those &gt; 1. Find fractions of numbers and quantities, writing remainders as a fraction.</b></p>	<p>Identify multiples/factors, including finding all factor pairs of a number, &amp; common factors of two numbers. Know/use vocabulary of prime numbers, prime factors and composite (non-prime) nos. Establish if a number up to 100 is prime; recall prime numbers to 19. <math>\times</math> nos mentally using known facts. Multiply whole numbers and those involving decimals by 10/100/1000.</p>	<p><i>Pupils ... apply all the x tables frequently, commit them to memory and use them to make larger calculations. They understand the terms factor, multiple/prime, square/cube numbers &amp; use to construct equiv. statements (eg <math>4 \times 35 = 2 \times 2 \times 35</math>; <math>3 \times 270 = 3 \times 3 \times 9 \times 10 = 9^2 \times 10</math>).</i></p>
Y6	<p>Multi-digit numbers (up to 4 digits) <math>\times</math> TU whole number using the <b>formal</b> method of <b>long multiplication</b>.</p> <p>Multiply one-digit numbers with up to two decimal places by whole numbers</p>	$256 \times 18 = 4608$ (estimate $250 \times 20 = 5000$ ) 	<p><b>Long</b></p> $\begin{array}{r} 124 \\ \times 26 \\ \hline 744 \\ 2480 \\ \hline 3224 \end{array}$ <p><b>Multiplication (formal):</b></p> $124 \times 26 = 3224$ <p><b>[NB See Y5 method]</b></p>	<p>Short multiplication (formal)</p> $4.7 \times 8 = 37.6$ (estimate $5 \times 8 = 40$ ) $\begin{array}{r} 4.7 \\ \times 8 \\ \hline 37.6 \end{array}$ <p>40) [Or <math>47 \times 8</math>, then divide the solution by 10.]</p>	<p>Grid Method:</p> $5.65 \times 9 = 50.85$ (estimate $6 \times 9 = 54$ ) $\begin{array}{r l l l} \times & 5 & 0.6 & 0.05 \\ 9 & 45 & 5.4 & 0.45 \\ \hline & 50.85 & & \end{array}$ <p>[Or compute <math>565 \times 9</math>, then divide the solution by 100.]</p>	<p><i>Use a variety of images to support understanding of <math>\times</math> with fractions. Use understanding of relationship between unit fractions and <math>\div</math> to work backwards by <math>\times</math> a quantity that represents a unit fraction to find the whole quantity (eg if <math>\frac{1}{4}</math> of a length is 36cm, whole length <math>36 \times 4 = 144</math>cm). <math>\times</math> numbers with up to 2dp by U/TU whole nos (starting with simplest cases eg <math>0.4 \times 2 = 0.8</math>, and in practical contexts).</i></p>	<p>Perform mental calculations, including with mixed operations/large numbers. Identify common factors/multiples and prime numbers. Use knowledge of order of operations to carry out calculations. Use estimation to check answers to calculations and determine an appropriate degree of accuracy. Identify value of each digit to 3dp and <math>\times</math> nos by 10/100/1000 (ans to 3dp)</p>	<p><i>Undertake mental calcs with increasingly large numbers and more complex calculations. Continue to use all x tables to calculate statements in order to maintain their fluency. Explore the order of operations using brackets. Common factors can be related to finding equivalent fractions.</i></p>

Rapid Recall/Mental Calculations

Non-statutory guidance

STATUTORY EXPECTATIONS NC 2014						Rapid Recall/Mental Calculations	Non-statutory guidance
YR	Children ... solve problems, including doubling, halving and sharing. [Expected] They solve practical problems that involve sharing into equal groups. [Exceeding]	Practical / recorded using ICT (eg digital photos/pictures on IWB)	<p>Pictures/Objects</p> <p>6 cakes shared between 2</p>  <p>6 cakes put into groups of 2</p> 	<p>Symbolic</p> <p>6 cakes shared between 2</p>  	<p>There are 8 raisins. Take half of them. How many do you have?</p> <p>Share the 10 grapes between 2 people.</p>		
Y1	Solve one-step problems using concrete objects, pictorial representations and arrays (with the support of the teacher)	<p>Practical/recorded using ICT</p> <p>There are 14 people on the bus. Half of them get off. How many remain on the bus?</p> <p>There are 20 people in the class. One quarter are boys. How many boys are there?</p>	<p>Pictures/Symbolic</p> <p>How many apples in each bowl if I share 12 apples between 3 bowls?</p> 	<p>Visual and Concrete (modelled using Numicon and Number lines/ beads/ objects)</p> <p><math>15 \div 5 = 3</math></p>  	<p>Recognise/find/name <math>\frac{1}{2}</math> as one of two equal parts of an object, shape or quantity. Recognise/find/name <math>\frac{1}{4}</math> as one of four equal parts of an object, shape or quantity.</p>	<p>Find simple fractions of objects, numbers and quantities</p> <p>Count on/back in 2s, 5s and 10s</p>	
Y2	Calculate statements within the multiplication tables and write them using the division and equals signs. [Show division of two numbers cannot be done in any order.] Find $\frac{1}{3}$ , $\frac{1}{4}$ , $\frac{3}{4}$ , $\frac{3}{4}$ of a length/object/quantity. Write simple fractions eg $\frac{1}{2}$ of $6 = 3$	<p>Pictures/Symbolic</p> <p>Four eggs fit in a box. How many boxes would you need to pack 20 eggs?</p> 	<p>Pupils use a variety of language to describe division.</p>	<p>Visual / Concrete (modelled using Numicon and Numberline)</p> <p><math>18 \div 3 = 6</math></p> 	<p>Arrays</p> <p>Find <math>\frac{1}{4}</math> of 24 <math>24 \div 4 = 6</math></p> 	<p>Partitioning</p> <p><math>32 \div 2 = 16</math> <math>20 \div 2 = 10</math> <math>12 \div 2 = 6</math></p>	<p>Recall &amp; use division facts for the 2, 5 and 10 multiplication tables, Recognise/find/name/write fractions <math>\frac{1}{3}</math>, <math>\frac{1}{4}</math>, <math>\frac{3}{4}</math>, <math>\frac{3}{4}</math> of a (length, shape), set of objects or quantity. Write simple fractions eg <math>\frac{1}{2}</math> of <math>6 = 3</math> and recognise equivalence of two quarters and one half.</p> <p>Use commutativity/inverse relations to develop multiplicative reasoning (eg <math>4 \times 5 = 20</math> and <math>20 \div 5 = 4</math>).</p> <p>Begin to use other multiplication tables/recall facts, including related division facts to perform written/mental calculations. Work with materials/contexts where division relate to grouping/sharing quantities. They begin to relate these to fractions/measures (eg <math>40 \div 2 = 20</math>, 20 is a half of 40). They connect unit fractions to equal sharing and grouping, to numbers and to measures</p>

Y3	<p>Write/calculate statements using the tables that they know (progressing to <b>formal</b> written methods).</p> <p>TU ÷ U (divisor is 2/3/4/5/8/10)</p>	<p>Chunking on a numberline (start at 0) 96 ÷ 4 = 24</p> 	<p>Multiples of the divisor</p> <p>85 ÷ 5 = 17</p> <p>10 x 5 = 50 7 x 5 = 35</p>	<p>Written (Chunking)</p> <p>51 ÷ 3 = 17</p> 	<p>Short Division (formal)</p> <p>51 ÷ 3 = 17</p> 	<p><i>Pupils develop reliable written methods for division, starting with calculations of TU by U, (progressing to formal written methods of short division).</i></p>	<p>Recall and use division facts for the 3, 4 and 8 multiplication tables.</p>	<p><i>Pupils develop efficient mental methods, using commutativity (eg 4 x 12 x 5 = 4 x 5 x 12 = 20 x 12 = 240) and multiplication and division facts (eg using 3 x 2 = 6, 6 ÷ 3 = 2 &amp; 2 = 6 ÷ 3) to derive related facts (30 x 2 = 60, 60 ÷ 3 = 20 &amp; 20 = 60 ÷ 3).</i></p>
Y4	<p><i>Pupils practise to become fluent in the formal written method of short division with exact answers [NS]</i></p> <p>TU ÷ U; HTU ÷ U</p>	<p>Chunking on a number line.</p> <p>Multiples of the divisor</p> <p>98 ÷ 7 = 14</p> <p>10 x 7 = 70 4 x 7 = 28</p>	<p>Short Division (formal)</p> <p>98 ÷ 7 = 14</p> 	<p>Multiples of the divisor</p> <p>252 ÷ 7 = 36</p> <p>30 x 7 = 210 6 x 7 = 42</p>	<p>Written (Chunking)</p> <p>252 ÷ 7 = 36</p> 	<p>Short Division (formal)</p> <p>252 ÷ 7 = 36</p> 	<p>Recall division facts to 12 x 12. Use place value, known/derived facts to ÷ mentally, including ÷ by 1. Find effect of dividing U/TU by 10/100, identifying the value of the digits in the answer as units/tenths/hundredths.</p>	<p><i>Practise mental methods and extend this to HTU numbers to derive facts, for example 200 x 3 = 600 into 600 ÷ 3 = 200. Relates decimal notation to division of whole number by 10 and later 100.</i></p>
Y5	<p>Use the <b>formal</b> written method of <b>short division</b> (interpret remainders appropriately for the context).</p> <p>HTU ÷ U ThHTU ÷ U</p> <p>Convert between units of measure (eg km/m; m/cm; cm/mm; kg/g; litre and ml)</p>	<p>Written (Chunking)</p> <p>346 ÷ 8 = 43 r2 (estimate &gt;40, &lt;50)</p> 	<p>291 ÷ 3 = 97 (estimate: 270 ÷ 3 = 90)</p>  <p>This is then shortened to:</p> 	<p>Short Division (formal)</p> <p>432 ÷ 5 = 86 r2</p>  <p>(estimate: 400 ÷ 5 = 80)</p>	<p>Short Division (formal)</p> <p>8520 ÷ 6 = 1420</p> 	<p><i>Pupils connect x by a fraction to using fractions as operators (fractions of), and to ÷. This relates to scaling by simple fractions, incl. those &gt; 1. Find fractions of numbers and quantities, writing remainders as a fraction.</i></p>	<p>Identify multiples/factors, including finding all factor pairs of a number, &amp; common factors of two numbers. Know/use vocabulary of prime numbers, prime factors and composite (non-prime) nos. Establish if a number up to 100 is prime; recall prime numbers to 19. ÷ nos mentally using known facts. Divide whole numbers and those involving decimals by 10/100/1000.</p>	<p><i>Pupils ... apply all the ÷ facts frequently, commit them to memory and use them to make larger calculations. They understand the terms factor, multiple/prime, square/cube numbers &amp; use to construct equivalent statements [eg 120 ÷ 15 = (30 x 4) ÷ 15 = 2 x 4 = 8]</i></p>

Y6

Divide numbers (up to 4 digits) by TU whole number using the **formal** method of **short/long division** (interpret as approp. for the context).  
Use written division methods in cases where the answer has up to 2dp.

[Divide numbers up to 2dp by U/TU whole numbers.]

$43.4 \div 7 = 6.2$   
(estimate  $42 \div 7 = 6$ )  
 $6 \times 7 = 42$   
 $0.2 \times 7 = 1.4$   
 $25.6 \div 7 = 3.2$   
(estimate  $>3, <4$ )

Written (Chunking)

$$\begin{array}{r} 25.6 \div 8 \\ \text{(estimate: } 24 \div 8 = 3) \\ 8 \overline{)25.6} \\ \underline{-24.0} \quad (8 \times 3.0) \\ 1.6 \\ \underline{-1.6} \quad (8 \times 0.2) \\ 0 \end{array}$$

Short Division (formal)  
 $43.68 \div 7 = 6.24$   
(estimate:  $42 \div 7 = 6$ )  
[Or compute  $4368 \div 7$ , then divide the solution by 100.]

$$7 \overline{)43.68} = 6.24$$

Short Division (by TU)  
 $496 \div 11$   
(estimate  $500 \div 10 = 50$ )

$$\begin{array}{r} 45 \text{ r } 1 \\ 11 \overline{)496} \\ \underline{44} \phantom{0} \\ 56 \\ \underline{55} \\ 1 \phantom{0} \end{array}$$

Answer:  $45 \frac{1}{11}$

Long division (NC 2014)  $432 \div 15 =$

$$\begin{array}{r} 28 \\ 15 \overline{)432} \\ \underline{30} \phantom{0} \\ 132 \\ \underline{120} \\ 120 \\ \underline{120} \\ 0 \end{array}$$

$\frac{12}{15} = \frac{4}{5}$   
Answer:  $28 \frac{4}{5}$

Long division involving decimals (NC 2014)

$$\begin{array}{r} 28.8 \\ 15 \overline{)432.0} \\ \underline{30} \phantom{0} \\ 132 \phantom{0} \\ \underline{120} \phantom{0} \\ 120 \phantom{0} \\ \underline{120} \\ 0 \end{array}$$

$432 \div 15 = 28.8$

Perform mental calculations, including with mixed operations/large numbers.  
Identify common factors/multiples and prime numbers.  
Use knowledge of order of operations to carry out calculations.  
Use estimation to check answers to calculations and determine an appropriate degree of accuracy.  
Identify value of each digit to 3dp and  $\div$  nos by 10/100/1000 (ans to 3dp)

*Undertake mental calculations with increasingly large numbers and more complex calculations. Continue to use all table facts to calculate statements in order to maintain their fluency. Explore the order of operations using brackets. Common factors can be related to finding equivalent fractions.*
