

Using the shapes on Page 2, sort them into the different categories.

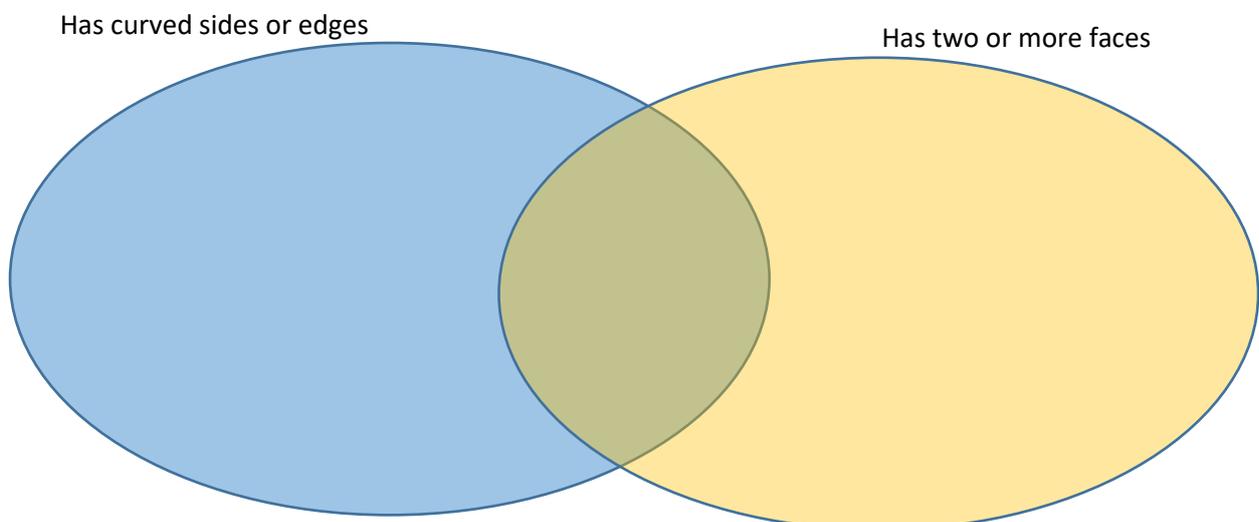

1.) Put the shapes into the correct categories

Triangle	Quadrilateral	Pyramid	Prism	2D shapes with more than 5 sides

2.) Sort these shapes into the correct boxes on the Carroll diagram:

	2D shape	3D shape
All sides are equal in length		
Not all sides are equal in length		

3.) Complete this Venn Diagram:

Using the shapes on Page 2, sort them into the different categories.

Shapes to sort
Pentagon (regular)
Right-angled triangle
Rhomus
Hexagon (regular)
Pentagonal pyramid
Trapezium
Nonagon (regular)
Hexagonal prism
cube
Equilateral triangle
Triangle based pyramid
Cuboid
Decagon (regular)
Rectangle
Isosceles triangle
Square
Septagon (regular)
Pentagonal prism
Triangular prism
Square based pyramid
Octagon (regular)
