

To distinguish between 3d shapes

I can name common 3d shapes

I can describe the features of 3d shapes

<p>cube</p> 	<p>6 faces</p> <p>8 vertices</p> <p>12 edges</p>
<p>cylinder</p> 	<p>3 faces</p> <p>0 vertices</p> <p>2 edges</p>
<p>cone</p> 	<p>2 faces</p> <p>1 vertex</p> <p>1 edge</p>

Can you play matching pairs with someone in your house.

You could do this with the shape names or the descriptions of the shapes.

cube

Can you write  
your own fact  
sheet to go with  
a 3d shape?

## Cuboid

Cuboids have:

-  6 faces
-  12 edges
-  8 vertices
-  **Not** all edges are the same.

<b>Cube</b>	I have no edges I have 1 curved face I have no vertices	
<b>Cuboid</b>	I have 2 circle faces I have one curved face I have 2 curved edges I have no vertices	
<b>Sphere</b>	I have 6 square faces I have 8 vertices I have 12 edges	
<b>Cylinder</b>	I have 5 faces I have 8 edges I have 5 vertices	
<b>Cone</b>	I have 6 faces I have 8 vertices I have 12 edges	
<b>pyramid</b>	I have 1 circle face I have 1 curved face I have 1 edge I have 1 vertex
