SAVE OUR OCEANS

Would you rather have no plastic or plastic?

IF WE DON'T START CLEARING OUR
SEA'S THEN WE'LL HAVE
MORE PLASTIC THAN
FISH!!!

Please save our seas by recycling or even better
don't use that stuff any more.
If we do this future generation
will find the other mysterious
creatures and give them
very cool names.

SAVE OUR OCEAN!

The sea is blue and sometimes cold,
But I do not know if you have been told,
Under the sea you will find something that will never die,
Its name is plastic. It is everywhere,
In your cabinets up the stairs,
You use it for cups, plates and bowls and here's the bit that hasn't
been told.
You may wonder where this plastic goes,
It blows through the air and into the sea and drifts through the
water making the fish unhappy.
They get caught in nets, gloves and much more,
Killing them which we just ignore,
But we can stop this, and I know how,
The world has these things called recycling bins.
They help the ocean and the creatures within
So next time you pass one and you have got an empty bag throw it
away, (appropriately), and this you can brag:

**I am helping to save
the planet!**

This is a whale with plastic around it.

The whole thing is made out of: A cardboard box, bubble wrap, blue paint, coloured pens, a marker and a yoghurt pot. This model represents how sea creatures are dying because of plastic pollution.

Dear Mr Johnson

The Great Pacific Garbage Patch is 1.6 million square kilometres of plastic rubbish between Hawaii and California. It is a danger to the ocean and all marine wildlife.

I would like to say that we should go to the Pacific Garbage Patch to collect all the rubbish and then the sea life that lives there won't eat the plastic and garbage. Then we could recycle and repurpose the plastic and rubbish into materials like plastic bricks to make houses and furniture.

This is vital for the future of our planet and it will be a better planet for us and the animals we care for. I drew and coloured some Beautiful pictures of a bottle house and plastic furniture. So if you want to save are planet I suggest you do it now. 🐟 🐟 🐟

And we can make houses for poor people who don't have enough money for the houses that are very expensive.

And I think 🤔 all homes 🏠 should be made from plastic for the environment. It will be good for the world 🌍 . So this is a good opportunity to do it now ok 👍 good :-). 😊 🌈 🐱

From a concerned 10 years old girl 🧒 .

Rose 🌹 🐱

Facts (we need to stop this!)

- There is more plastic in the ocean than fish.
- It takes over 400 years for plastic to break down.
- 90% of seabirds eat plastic, mistaking it for food.
- 20% of fish found had plastic in their stomachs.
- Every day around 8 million pieces of plastic make their way into our oceans.
- Sea turtles eat plastic bags, mistaking them for jellyfish.

**Stop
Pollution!**

OCEAN ISN'T
A DUMP!

Ocean

Did you know?

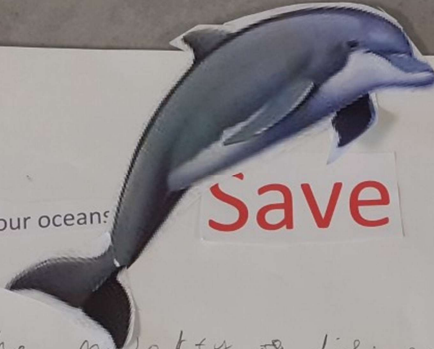

- It takes over 400 years for plastic to break down.
- 700 different marine species are severely threatened because of plastic in the ocean.
- 22 million tonnes of carbon dioxide is absorbed by the ocean each day!!! This makes the water more acidic, which makes it harder for fish to breathe and for creatures like crabs, lobsters and coral to grow their shells.
- Lots of plastic is found washed up on beaches all over the world.
- 10% of all dead animals found in beach clean-ups worldwide have been entangled in plastic bags.
- 5 trillion pieces of plastic are estimated to be floating in the world seas.
- 90% of sea birds eat plastic rubbish, mistaking it for food.
- 20% of fish found had plastic in their stomach.

- There is now 5.25 trillion macro and micro pieces of plastic in our ocean and 46,000 pieces in every square mile of ocean weighing up to 269,000 tonnes.
- Every day around 8 million pieces of plastic make their way into our oceans.

Don't dump in our oceans

Save

our

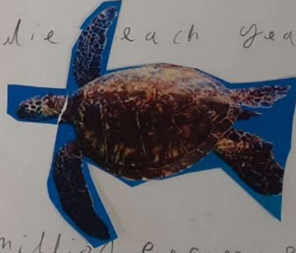

marine

FACT 1: the majority of life on earth
is aquatic so it's our natural way
are polluted so the majority of life on earth

life!

every minute
a garbage
truck of plastic
is dumped into
our oceans

FACT 2: 100 million ocean animals die each year from
pollution

FACT 3:

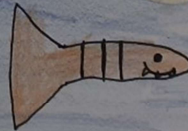

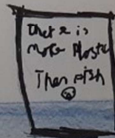

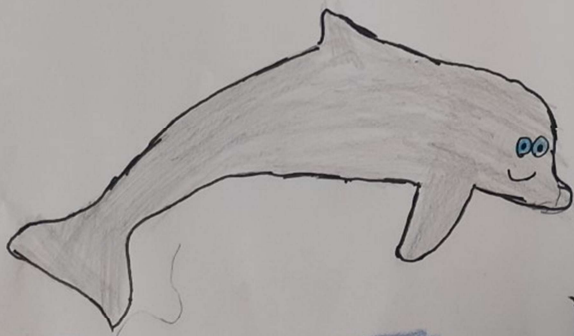

every day approximately 8 million pieces of plastic
pollution find their way into our oceans

FACT 4:

KEEP OUR
OCEANS CLEAN AND
SAVE THE ANIMALS

RECYCLING

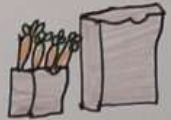

Bent Bottles

 = You can put water in it and drink it.

Plastic Bags
 = You can use these for when you go shopping.

Paper Bags *similar*

 = You can also use these for shopping or collecting things.

Jars

 = You can put food in it for your house.

Bottles (metal plastic)

  = Just like Bent Bottles but you can put in fizzy drinks, coffee etc.

Styrofoam Boxes

 = You can put food in this and take out with you like a picnic.

Straws

  = You can use these for drinking.

Help us!

Save our oceans animals are in danger. Instead of Tweeting it saying "SAVE THE OCEAN!" do it, DO IT NOW!

SAVE THE OCEAN!

Kayla l'anson

Save our Oceans

SOME AMAZING FACTS ABOUT MARINE POLLUTION

1. 52% of sea turtles worldwide have accidentally eaten plastic rubbish in the ocean.
2. 22 million tonnes of gas called carbon dioxide (CO₂) is absorbed by the ocean each day because of rubbish.
3. 443 birds and animals were found in nets during a recent international clean-up.
4. 100,000 marine animals die from getting entangled in plastic yearly.
5. China is ranked #1 for mismanagement of waste and plastic.
6. 300 million tons of plastic gets created yearly.
