LO: To understand the value of money

Know: Understanding:

I can explain which item cost more or less.

Show :Applying

I can order the coins by value.

I can represent the value of each coin on a numberline.

Vocabulary

Coins
Money
Value
Order
add
Price
Cheapest
More
Less

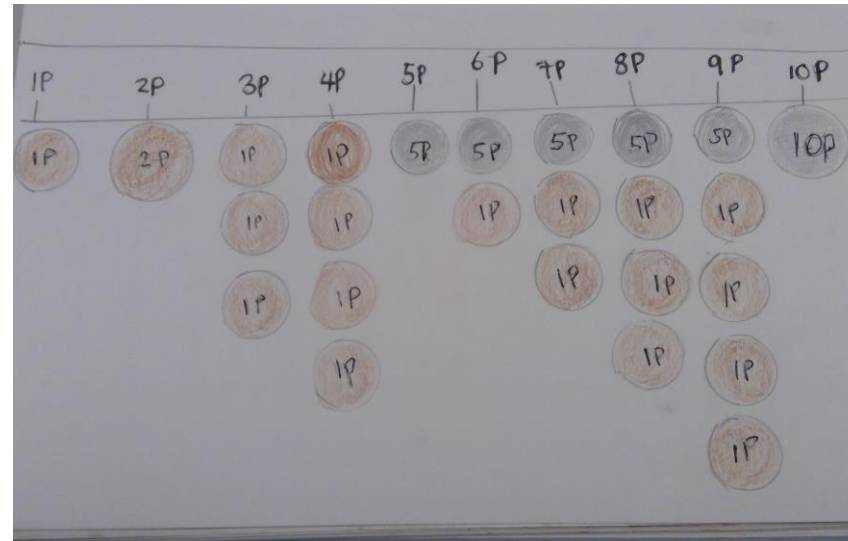

Watch Miss Coleman's video.

Activity:

First create your own number line to show the value of each coin (1p,2p,5p,10p).

Next order the animals from the story Supermarket zoo using your coin numberline by price.

Can you say which animal cost the most and which animal cost the least?

Key Questions

Which animal is the cheapest? How do you know?

Which animal costs more? How do you know?

How can you prove you are right? Can you show me how you found the answer?

Example:

The penguin is the cheapest pet to buy because I know 2 is smaller than 10. I would need two pennies or a 2p coin to buy the penguin but I would need ten pennies or 10p coin to buy the lion So I would need more money.

Chilli Challenge

Create your own shop , this could be a toy shop, pet shop etc you decide.

Price up all of the objects at 1p,2p,5p or 10p .

You could invite your family to visit your shop to buy one item each. Have they given you the right money.?

Can you create a receipt?

Can you order your products by how much they cost?

Or you can visit your own shop.

Or

Can go to the shop and buy something using the correct coins.
