In total
Expensive

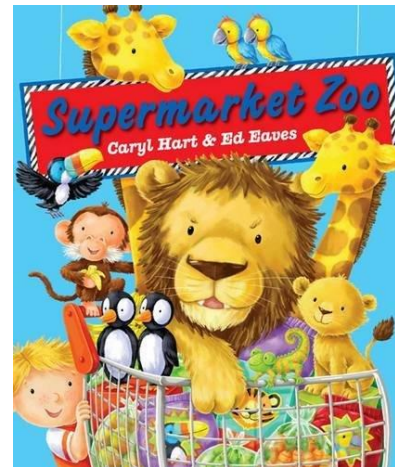

Watch Miss Coleman's video.

Activity: Visit the super market zoo shop three times. Each time select and buy two animals at a time by finding the total cost.

Can you pay for two animals from the supermarket zoo?

Can you select two animals at a time and add the prices together to find the total

Can you explain how you got your answer?

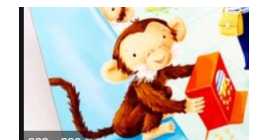

Example:

5p

1p

Key Questions

Which coins do you need to make the total?
Can you use your coin number line to make each price?
What does finding the total mean?
How did you find the total?

"If I buy a lion cub and a monkey the total money to pay is 6p."

Thursday 25th February

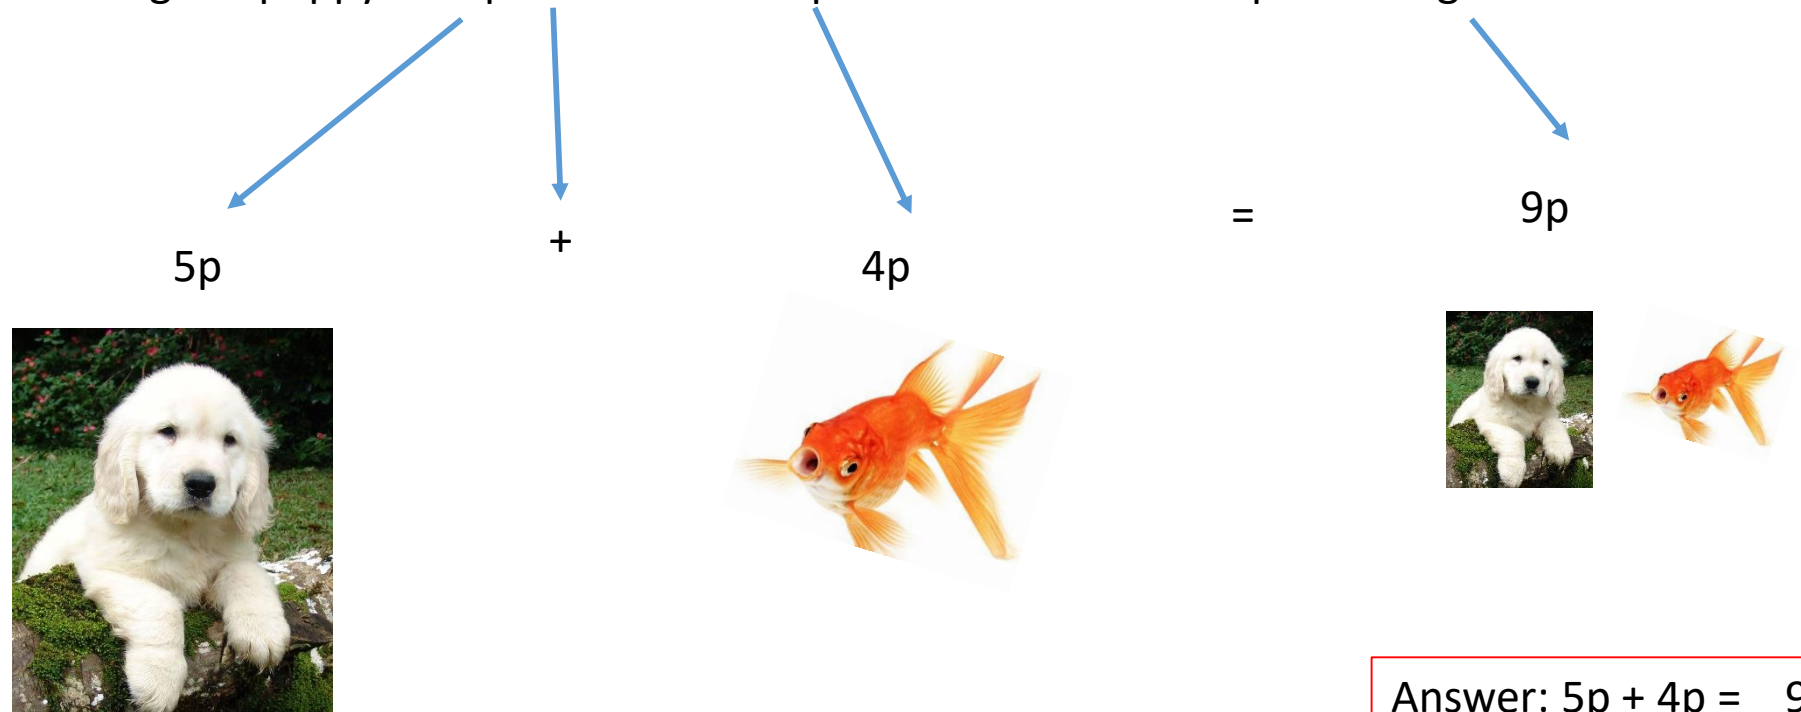

Chilli Challenge :

To write the word problems as number sentence to show how you have found the answer.

Example:

Katie went to the shop and brought a puppy for 5p and a fish for 4p. How much did she spend altogether?

Answer: $5p + 4p = 9p$

Thursday 25th February

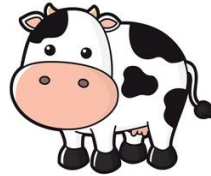

Chilli Challenge :

To write the word problems as number sentence to show how you have found the answer.

Chilli challenge word problem 1:

Katie went to the shop and brought a cat for 5p and a cow for 2p. How much did she spend altogether?

Chilli challenge word problem 2:

John went to the shop and brought a panda for 7p and a penguin for 3p. How much was the total cost for both animals?
